

## Fit for the Future - Our Commitment

Our Trust, and its Strategic Business Units (SBUs), has achieved a lot in recent years to put in place a solid foundation from which we can build mental health services that we are all proud of and are fit for the future. Our staff, clinicians and partners also tell us that we need to:

- provide services that are more locally owned and responsive when locally commissioned against national standards
- manage change more effectively to benefit our staff and our partners
- involve clinicians as part of contract and commissioning discussions, clinical governance and service planning
- listen to service users and carers, responding to their feedback, involving them in the design and delivery of services
- change our culture to be less top down and improve staff morale

In responding to the challenge we believe we share some key values including:

- open, honest and transparent communication
- being judged by the outcomes we deliver both individually and collectively
- partnership and collaboration in our engagement with stakeholders
- developing our leadership behaviours together to make a real difference to staff, users, carers and partners
- ensuring that central, corporate and HQ functions in the Trust clearly add value to front-line services

To be fit for the future we are all making a series of commitments to

- put service users and carers at the centre of everything we do – every team, ward and staff member and the Trust Board
- decentralise management and increase the local service authority of SBUs within a clear corporate accountability framework and governance
- develop and implement a clinical engagement strategy to underpin local, SBU and Trust wide decision making and improve staff morale

Our clinical and medical engagement is focused on quality and involvement in contract and commissioning negotiations to support effective clinical governance and performance improvement. It is based on strong clinical networks to ensure clinical governance is a dynamic, local and strategic force. It builds on the work of existing clinical networks (e.g. the Medical and Nursing Advisory Groups, Modern Matrons Network and Professional Council) and explores the case for additional protected time for clinicians.

We are restructuring our organisation to ensure locally responsive operational activity and ongoing quality and performance improvement. The role of the Medical Director is strengthened to support medical leadership and engagement. There is a single Executive focus on quality and patient safety. Significantly improved Trust and SBU commercial and marketing capability prior to becoming a Foundation Trust is also key.

The decentralisation of power, authority and responsibility to SBUs is based on the guiding principles of *Stewardship* (the required executive, leadership and governance functions); *Transactions* (central services at the SBU interface) and *Decision Support* that adds value (specialist expert advice, support and consultancy).

The Trust Board has a detailed Fit for the Future implementation plan to ensure it addresses the recommendations of the NHS South SHA independent review report on governance and management arrangements of the Trust (dated January 2012 and received late March 2012). The implementation plan (Appendix 1) makes a clear difference within a reasonable but challenging timescale - in the first 6 months to September 2012 and the year following. We will judge ourselves and be judged by others - our service users and carers, commissioners and staff - by the delivery of measurable outcomes including:

- delivery of the implementation plan and its process indicators - including appointments, Board reports, strategy implementation
- ongoing performance improvement in contractual and national metrics - particularly Care Programme Approach (CPA) and carers
- an upward trend in patient survey indicators - particularly in connection with CPA
- improved staff survey indicators - including appraisal, staff satisfaction, incident reporting and recommendation of the service to others
- meeting the internally set and measured 85% appraisal target, and improved supervision rates, in outlying SBUs and teams
- improvements in real time local and Trust patient and staff surveys
- future commissioning intentions and commissioner convergence on our Integrated Business Plan (IBP)

The process of transformation is not confined to just these actions or timetable - rather it starts with them and will be ongoing.

As with all things its success lies not just with a small number of named individuals but our will and determination to succeed as staff, clinicians and leaders in the NHS.

### 1. AIMS OF THE FIT FOR THE FUTURE (FFtF) PROGRAMME

Fit for the Future is a programme of organisational change that aims to:

- put service users and carers at the centre of everything we do – every team, ward and staff member and the Trust Board

- decentralise management and increase the local service authority of SBUs within a clear accountability framework
- develop and implement a clinical engagement strategy to underpin local, SBU and Trust wide decision making and improve staff morale.

The change programme has been developed through an iterative process starting with the April and May 2012 Trust Board seminars. Feedback from NHS South SHA has been incorporated in the plan as it has developed. The programme breaks into two parts:

- Short Term – April to September 2012 to ensure the change process is pump primed. This work has been implemented and this plan closed. It was subject to internal audit reporting to the September 2012 Trust Board. Audit comments and recommendations have been incorporated into a refresh of the medium term plan ready for Board approval.
- Medium Term – October 2012 to October 2013 to ensure the embedding of change

## 2. FFtF PROGRAMME STRUCTURE

The Chief Executive is the sponsor of the Implementation Plan on behalf of the Board. This programme of work addresses the findings of the NHS South SHA independent review report on governance and management arrangements of the Trust, received and accepted at the April 27<sup>th</sup> 2012 Trust Board and published following the SHA July 26<sup>th</sup> 2012 Board meeting. The recommendations from this report are the basis of the objectives (in blue) in the implementation plan providing the focus for action. It also reflects discussions in the Trust through 2011 to increase autonomy for SBUs, change the way we work and rise to the challenge of the future. The FT Director (Jane Britton) is the programme lead and holds a strategic overview of the work. The FT Director also has the lead responsibility for the further independent investigation into the alleged falsification and/or alteration of service user records in The Trust (June-Nov 2012). Actions to respond to this report are integrated into this action plan as required by the Trust Board 19<sup>th</sup> December 2012.

## 3. FFtF REPORTING AND SCRUTINY

Progress reporting to the Trust Board, and its Board committees, against the Implementation Plan will be monthly using the FT programme infrastructure (Board, ET, TWMG) - reviewed to ensure they remain for purpose. Trust Board Committees are proactively involved in robust scrutiny and assurance of the implementation plan with monthly reporting to Board on progress, strategic matters and any required escalation. Actions are colour coded as follows according to assigned Board Committees:

<b>Trust Board (Brd)</b> - grey	<b>Quality and Safety Committee (Q&amp;S)</b> - blue
<b>Finance and Planning Committee (F&amp;P)</b> - green	<b>Audit and Risk Committee (A&amp;R)</b> - yellow
<b>Employee Strategy and Engagement Committee (ESE)</b> - pink	

A RAG assessment will be applied to the implementation to support progress reporting and Board scrutiny.

<b>RED</b>	No progress made – or significant risk to delivery	<b>AMBER</b>	Limited progress made and slipping against timescale	<b>GREEN</b>	Delivered	<b>NO COLOUR</b>	Pending/ on schedule
------------	--	--------------	--	--------------	-----------	------------------	----------------------

**4. FFtF IMPLEMENTATION PLANNING PRINCIPLES.** Actions must be SMART :

**S** - SPECIFIC

**M** - MEASUREABLE

**A** - ACTION ORIENTED

**R** - REALISTIC

**T** - TIMETABLED

**5. FFTF OBJECTIVES**

The objectives are drawn from recommendations of the two independent review reports receive in the Trust in 2012 - on governance and management arrangements of the Trust (received in the Trust April 2012) and the alleged falsification and/or alteration of service user records (Nov 2012). In a small number of areas the report recommendations overlap and therefore are represented only once as an objective. Where this is the case it is indicated in the objectives identified below.

No	FFtF Objectives	Report Recommendations	
		April 2012 Gov & Leadership	Nov 2012 Records (Wilts)
1	The Board is refocusing and changing our culture from a top down centralist bureaucracy to one of clinical primacy, inclusively, engagement and high quality performance ownership.	√	√
2	The Board is reviewing the executive and non-executive skills of the Trust Board to ensure that there is the requisite leadership skills and ability to lead the change in culture, with an appropriate emphasis on the challenge and scrutiny of clinical quality and safety of care.	√	
3	The Board is designing, consulting on and will implement a comprehensive clinical engagement strategy. Executive Directors commit to consulting meaningfully with clinical managers and senior clinicians of all professions about how to engage them reliably in decisions about service redesign, service delivery and contracting criteria.	√	
4	The Trust is reviewing and rationalising its focus on engaging and involving patients, carers and families. It commits to putting users and carers at the centre of everything we do.	√	
5	The Trust is improving the consultation, dialogue and speed of organisational development, consultation and change to ensure the burden of implementation does not detract from the day to day delivery of safe clinical care and staff support.	√	

6	The Trust is reviewing its Performance Management framework to adopt a new approach to performance based on constructive and supportive dialogue with SBUs driven by quality and safety. This includes clinical audit, research, carer engagement etc. It suspended the Facilitated Early Discharge target in Feb 2012 whilst it and other demanding KPIs are reviewed particularly where they have little or no clinical validity. The Trust is including its clinical staff in working with commissioners to further reduce and simplify the number of KPIs/performance targets, making them as simple, understandable and intuitively clinically relevant as possible - using a clinical evidence base for contracting to deliver real quality and patient safety. This will be integrated in our clinical engagement strategy.	√	√
7	The Trust Board is improving its CPA performance and related service improvement in all clinical areas, in particular the adult community SBU. An urgent review of current CPA standards, operational policies and procedures has supported understanding the shortfall in performance and identification of remedial action.	√	
8	The Trust is taking a more rigorous approach to incident reporting to ensure that lessons are learnt in a timely and productive fashion and implementing a new electronic incident reporting system that will be integrated with the RiO clinical record system.	√	
9	The Trust Board Audit Committee is scrutinising the organisation's risk registers to support informed judgements about the robustness of the process, number of risks, their grading and mitigations.	√	
10	The Board is revisiting the Homicide Inquiry reports to ensure any outstanding or ongoing issues identified are addressed and effectively implemented and frequently scrutinise progress until it is fully embedded.	√	
11	The Board is determining reasonable but challenging timescales for major change projects, holding to account those responsible for implementation.	√	
12	The Trust is progressing its FT application building on the improvements made as a result of the FFtF programme of action	√	
13	The Trust is reviewing, and where necessary, updating and amending its arrangements for data protection to ensure compliance with legislation		√
14	The Trust is revising and reissuing its policies relating to information governance and record keeping making them more explicit about what staff should do and not do, ensuring that they are sufficiently succinct that staff can access key information quickly and easily through the use of a summarised key point's page		√
15	The Trust is aiming to increase the proportion of time patient-facing staff are able to spend with patients by reducing the burden of data collection and input and introducing mobile hand held technology so that data can be collected and input in conjunction with patients and carers.		√
16	The Trust is appointing a skilled and experienced social care leader to act in a lead professional role		√

43. Obj 13 F&P	<p><b>Third Party Consent - Data Protection</b></p> <p>The Trust's solicitor notes that there is no requirement to take consent from a third party (for example, a carer) where the information is relevant to the care being provided to a service user.</p> <p>The DPA also requires the Trust to process information fairly. This does not extend to require the Trust to actively contact all third parties whose data is recorded by the Trust to take their consent.</p> <p>The Trust sought advice from the Information Commissioner's office in relation to third party consent, in specific, the recording of carer's details without consent. The advice, given in a telephone call, was that this was not a breach of the DPA.</p>	<p>The Trust, as Data Controller, is required to ensure that any personal data is processed in accordance with the provisions of the DPA. It is accepted that the name and contact detail's are classed as personal data and accordingly in order for the Trust to be able to lawfully process this information (i.e make note of it in the records)</p> <p>The Trust is required to satisfy a condition contained within Schedule 2 of the DPA. The Trust believes that it is able to satisfy Condition 6 (1), which relates to the legitimate interests pursued by the Data Controller.</p>	Director of Finance & Commerce	August 2012	<b>GREEN</b> AWP has demonstrated compliance as Data Controller, for Condition 6 (1) set out in the provisions of the DPA and will continue as required.

<b>48.</b> Obj. 15 F&P	<b>RiO training and computer literacy</b> IT literacy is a core competency for all staff. Ensure all staff required to enter data into RiO have had the appropriate level of training to ensure that they 'know what they're doing' in the various parts of RiO - (both in general terms and also in terms of typing skills), The more skilled staff are, the quicker they will navigate around the system, entering required data.	Data Errors will be reduced and assurance can be given to accurate performance indicators measuring both performance and activity.  Ongoing delivery of training to existing staff and new starters. And updating of staff guidance	Director of Finance & Commerce	Sept 2013	<b>PENDING</b> CSMG work plan incorporates work to simplify clinical processes supported by RiO e.g. CPA resulting in revised advice, guidance and training to reinforce these changes. Decision to implement paperless
